| Document Reviewed                  | PRDF Client Portal User Manual                                                                                             |
| Manual Version                     | Version 1.0                                                                                                                |
| Manual Date                        | 26 September 2026                                                                                                          |
| Project Completion / Handover Date | 30 September 2026                                                                                                          |
| Prepared By                        | Rand Consortium (Pty) Ltd                                                                                                  |
| Purpose                            | Formal close-out of reviewer comments and identification of items requiring PRDF confirmation before any system amendment. |

### 1. Purpose and Status of Review

This register records the comments made on the reviewed Client Portal User Manual and provides Rand Consortium's response to each comment. It distinguishes documentation corrections and technical clarifications from comments that would change or add to PRDF's documented business rules.

**For avoidance of doubt:** an item marked "PRDF CONFIRMATION REQUIRED" is not treated as an approved system change until PRDF confirms the requirement. The review comments are being addressed as part of documentation review, UAT clarification and project close-out, and do not by themselves alter the 30 September 2026 completion status of the delivered work.

### 2. Classification

| Status                        | Meaning                                                                                                                                           |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| ACCEPT - DOCUMENTATION        | Editorial, terminology, explanation or branding correction; no material system change.                                                            |
| TECHNICAL CLARIFICATION       | Existing behaviour/configuration must be confirmed by the developer and accurately documented.                                                    |
| KNOWN LIMITATION / REFINEMENT | An item already disclosed in the delivered manual that may be refined during close-out.                                                           |
| PRDF CONFIRMATION REQUIRED    | A proposed business-rule, policy, eligibility, lending, disclosure, disbursement or data requirement that PRDF must approve before system change. |
| NO SYSTEM CHANGE              | A review/UAT note rather than a development instruction.                                                                                          |

### 3. Page-by-Page Reviewer Comments Response Register

| Page | Reviewer Comment / Edit                                                          | Formal Response / Assessment                                                                                                                                            | Status                                               |
|------|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| 2    | Replace "Who to contact" with "Troubleshooting".                                 | Accepted as a heading/presentation change.                                                                                                                              | ACCEPT - DOCUMENTATION                               |
| 3    | Financial Statements: 2 years Annual Financial Statements & Management Accounts. | The clean manual states latest annual financials or management accounts. Requiring two years plus management accounts changes the documented requirement.               | PRDF CONFIRMATION REQUIRED                           |
| 3    | Vendor Quotations: 3 quotations.                                                 | The clean manual already states three quotations. Wording can be clarified. PRDF confirmation is only needed if exactly three separate uploads must be system-enforced. | DOCUMENTATION; PRDF if enforcement changes           |
| 3    | PO / Short-Term Contract: additional conditions marked.                          | Additional mandatory conditions beyond the clean manual should be specified and approved by PRDF.                                                                       | PRDF CONFIRMATION REQUIRED                           |
| 3    | Trade Reference: 3 trade references.                                             | The clean manual refers to a reference. Three mandatory references would be a changed requirement.                                                                      | PRDF CONFIRMATION REQUIRED                           |
| 3    | Add personal contact details / alternative contact number.                       | This would add an application data field.                                                                                                                               | PRDF CONFIRMATION REQUIRED                           |
| 3    | "10 minutes with your documents to hand" - explain.                              | Explain as an indicative estimate or remove the statement.                                                                                                              | ACCEPT - DOCUMENTATION                               |
| 4    | Loan limit noted as R3 million.                                                  | The clean delivered manual states R250,000-R1,000,000. R3 million conflicts with the documented limit.                                                                  | PRDF CONFIRMATION REQUIRED                           |
| 4    | Highlight indicative-rate disclosure / wording corrections.                      | Accepted as presentation/editorial improvement.                                                                                                                         | ACCEPT - DOCUMENTATION                               |
| 7    | Phahla Consultants -> Phahla Consulting.                                         | Naming/branding correction.                                                                                                                                             | ACCEPT - DOCUMENTATION                               |
| 7    | Clarify applicant must have access to email address.                             | Accepted wording clarification.                                                                                                                                         | ACCEPT - DOCUMENTATION                               |
| 8    | "Loans up to R3 000 000".                                                        | Same conflict as page 4. Do not alter system limit until PRDF confirms the approved maximum.                                                                            | PRDF CONFIRMATION REQUIRED                           |
| 8    | Explain account creation / no confirmation email.                                | Clarify existing behaviour in the manual.                                                                                                                               | ACCEPT - DOCUMENTATION                               |
| 9    | Forgot-password window requested.                                                | The clean manual already discloses that the reset page does not yet exist and administrator assistance is required.                                                     | KNOWN LIMITATION / REFINEMENT                        |
| 9    | Question whether limitation explanation is needed.                               | Clarify why it appears in handover documentation; update wording when functionality is refined.                                                                         | ACCEPT - DOCUMENTATION                               |
| 9    | Session expiry - "how long?"                                                     | Confirm actual configured timeout and document it.                                                                                                                      | TECHNICAL CLARIFICATION                              |
| 9    | Reword "survives closing the browser".                                           | Editorial improvement.                                                                                                                                                  | ACCEPT - DOCUMENTATION                               |
| 11   | Blue/Oceans Economy terminology / industry list questioned.                      | Final industry categories affect PRDF eligibility/product configuration and should be approved before dropdown changes.                                                 | PRDF CONFIRMATION REQUIRED                           |
| 13   | Insolvency/debt-review explanation marked/deleted.                               | Manual wording can be edited. If the actual portal declaration wording is to change, PRDF must approve the final wording.                                               | PRDF CONFIRMATION REQUIRED IF PORTAL WORDING CHANGES |
| 14   | Years in operation - add months option.                                          | Adds a data-capture requirement not documented in the clean manual.                                                                                                     | PRDF CONFIRMATION REQUIRED                           |
| 14   | Business bank -> Banking Institution.                                            | Accepted terminology correction.                                                                                                                                        | ACCEPT - DOCUMENTATION                               |
| 15   | Minimum 5 characters questioned.                                                 | If PRDF wants a different validation minimum, the new rule should be confirmed.                                                                                         | PRDF CONFIRMATION REQUIRED IF VALIDATION CHANGES     |
| 17   | Maximum upload size queried.                                                     | Developer to confirm current technical limit and document it; any new prescribed limit should then be approved/configured.                                              | TECHNICAL CLARIFICATION                              |
| 22   | Replace "We have it" with "Received".                                            | Accepted professional wording change.                                                                                                                                   | ACCEPT - DOCUMENTATION                               |
| 26   | Detailed pricing/risk information should not be on website / should go to Admin. | This changes what PRDF chooses to disclose to applicants. PRDF must confirm exactly which pricing/risk information remains client-facing.                               | PRDF CONFIRMATION REQUIRED                           |
| 27   | Rename section to "Troubleshooting".                                             | Accepted heading change.                                                                                                                                                | ACCEPT - DOCUMENTATION                               |
| 27   | Rename "Common questions" to "Frequently Asked Questions (FAQ)".                 | Accepted heading change.                                                                                                                                                | ACCEPT - DOCUMENTATION                               |

| Page | Reviewer Comment / Edit                                                        | Formal Response / Assessment                                                                                                     | Status                     |
|------|--------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| 27   | Additional wording on changing submitted applications / required PO documents. | If the post-submission process differs from the clean manual, PRDF should confirm the intended process.                          | PRDF CONFIRMATION REQUIRED |
| 27   | POs paid directly to supplier; balance in client account.                      | This is a disbursement business rule and must align with the Admin Console. It should be approved by PRDF before implementation. | PRDF CONFIRMATION REQUIRED |
| 28   | "I will only be able to go through the full application this evening."         | Review/UAT status note; not a system defect or functional requirement.                                                           | NO SYSTEM CHANGE           |
| 28   | Mark against account registration / acceptance checklist.                      | Treat as UAT/acceptance evidence, not a development instruction.                                                                 | NO SYSTEM CHANGE           |

## 4. PRDF Decisions Required Before System Amendment

The following items require a formal PRDF decision because they change, add to, or conflict with the requirements documented in the clean Client Portal manual. PRDF may approve, reject or amend each item below.

| Page  | Decision Item                                | PRDF Decision Required                                                                                | Decision                                                                                              |
|-------|----------------------------------------------|-------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| 3     | <b>Financial statements</b>                  | Confirm whether the requirement is two years of annual financial statements plus management accounts. | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 3     | <b>PO / short-term contract requirements</b> | Confirm the complete mandatory document/validity conditions.                                          | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 3     | <b>Trade references</b>                      | Confirm whether three trade references are mandatory.                                                 | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 3     | <b>Alternative contact number</b>            | Confirm whether this becomes a mandatory application field.                                           | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 4 & 8 | <b>Maximum loan amount</b>                   | Confirm whether the approved maximum is R1,000,000 or R3,000,000.                                     | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 11    | <b>Industry categories</b>                   | Confirm the final industry/sector options for the application dropdown.                               | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 13    | <b>Insolvency / debt-review declaration</b>  | Confirm final wording if the actual portal declaration is to be changed.                              | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 14    | <b>Months in operation</b>                   | Confirm whether months must be captured in addition to years.                                         | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 15    | <b>Funding-use description validation</b>    | Confirm only if the current five-character minimum must change.                                       | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 26    | <b>Client-facing pricing/risk disclosure</b> | Confirm which rates, risk grades, fees and repayment information may be displayed to applicants.      | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 27    | <b>Post-submission PO documentation</b>      | Confirm the required process for additional PO/supporting documents after submission.                 | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |
| 27    | <b>PO / supplier disbursement</b>            | Confirm who receives payment for PO funding and how any balance is treated.                           | <input type="checkbox"/> Approve<br><input type="checkbox"/> Reject<br><input type="checkbox"/> Amend |

## 5. Completion and Handover Position

The parties acknowledge that the reviewer comments above are being considered during documentation review, UAT clarification and project close-out. Documentation corrections and clarification of existing functionality may be incorporated into the final manuals without changing the original completion date.

Where PRDF approves a new or amended business requirement identified in Section 4, that requirement will be recorded as a confirmed post-review amendment and assessed for implementation. Such confirmation does not, by itself, retrospectively change the status of the work delivered by 30 September 2026.

## 6. Formal Sign-Off

By signing below, the parties record their review of this response register and the classification of the comments. Signature does not automatically approve every proposed PRDF business-rule change; individual decisions in Section 4 should be completed or supported by separate written PRDF confirmation.
