

QA Test Manual — Admin Portal

How the application works, the test users and their roles, and step-by-step walkthroughs for verifying the admin portal end to end.

 Test / staging environment

 Admin portal

 Updated 11 Sep 2026

 All data is test data

1 What the application is

The PRDF Loan Management System (LMS) is a two-portal application backing a development-finance lending programme:

- **Admin portal** (this manual) — staff process loan applications through a review lifecycle, price them with the credit model, disburse funds, record repayments, run reports, and manage user access.
- **Client portal** — applicants register, complete the application wizard, upload documents, and track status.

Both portals authenticate against **Supabase** (email + password). The backend is a **NestJS API**; data lives in **Postgres** with row-level security. A single application moves through a fixed **lifecycle** (§5), and each stage is owned by a specific staff role.

Portals & URLs (test environment)

PORTAL	URL	WHO CAN LOG IN
Admin	<code>https://prdf-admin.vercel.app</code>	Internal / staff roles only (Client-only users are blocked)
Client	<code>https://prdf-lms.vercel.app</code>	Users with the <code>Client</code> role

The admin portal talks to the production API at `https://prdf-api.vercel.app`.

2 Before you start

- 1 Use **Google Chrome** (or any modern browser).
- 2 Go to the admin URL in §1.
- 3 Log in with one of the **test users** in §3.
- 4 To test a different role, **log out** (profile menu → Log out) and log back in as another user.

SHARED PASSWORD (ALL TEST USERS) **Prdf-Test-2026!**

All test accounts use `@prdf.test` email addresses and exist only in the test environment.

3 Test users & credentials

One account per role, plus one dual **Client + Admin** account. Password for every account:

Prdf-Test-2026!

#	EMAIL	ROLE(S)	ADMIN PORTAL ACCESS
1	superadmin@prdf.test	SuperAdmin	✓ Full access
2	admin@prdf.test	Admin	✓ Yes
3	intakeclerk@prdf.test	IntakeClerk	✓ Workflow
4	programofficer@prdf.test	ProgramOfficer	✓ Workflow
5	riskanalyst@prdf.test	RiskAnalyst	✓ Workflow
6	reviewcommittee@prdf.test	ReviewCommittee	✓ Workflow
7	programmanager@prdf.test	ProgramManager	✓ Management
8	board@prdf.test	Board	✓ Management
9	legal@prdf.test	Legal	✓ Workflow
10	financeofficer@prdf.test	FinanceOfficer	✓ Workflow
11	client@prdf.test	Client	✗ Blocked — client portal only
12	clientadmin@prdf.test	Client + Admin	✓ Enters as Admin

SuperAdmin inherits all Admin rights at runtime. **Client-only** users (#11) are denied the admin portal with an “Access restricted” screen — that is expected behaviour to verify, not a bug.

4 Roles & what they can see

Access to each admin area is role-gated. Use this matrix to know what to expect after logging in.

AREA / ROUTE	SUPERADMIN	ADMIN	PM, BOARD	WORKFLOW ¹	CLIENT
Dashboard /dashboard	✓	✓	✓	✓	✗
Pipeline /pipeline	✓	✓	✓	✓	✗
Case detail /case/:id	✓	✓	✓	✓	✗
Portfolio /portfolio	✓	✓	✓	✗	✗
Reports /reports	✓	✓	✓	✗	✗
Loans /loans	✓	✓	✓	✗	✗
User Access /user-access	✓	✓	✗	✗	✗

¹ Workflow roles = IntakeClerk, ProgramOfficer, RiskAnalyst, ReviewCommittee, Legal, FinanceOfficer.

What each role does in the lifecycle

ROLE	OWNS STAGE	TYPICAL ACTION
IntakeClerk	Submitted	Checks a new application is complete; advances to Screening
ProgramOfficer	Screening	Initial eligibility screen; advances to Due Diligence

ROLE	OWNS STAGE	TYPICAL ACTION
RiskAnalyst	DueDiligence	Sets the risk grade; prices the deal; advances to Evaluation
ReviewCommittee / ProgramManager	Evaluation	Recommends approval; advances to Approved
Board	Approved	Board sign-off; advances to Board Approved
Legal	BoardApproved	Contracting; advances to Contracting → Disbursed
FinanceOfficer	Contracting / Disbursed / InRepayment	Disburses funds, records repayments
Admin / SuperAdmin	any	Full administration incl. user access

 The **Client** role is special: it is assigned automatically at signup and identifies portal users. It **cannot be granted from the admin** — no one, not even SuperAdmin, can hand it out (verify in §7, WT-10). It can still be *removed* from a user.

5 Application lifecycle

An application moves forward one step at a time. Allowed transitions are enforced by the database, so illegal jumps are rejected.

Branches at review stages: **InfoRequested** (loops back to the applicant) and **Rejected** (terminal decline). **InfoRequested** returns to **Submitted** / **Screening**.

FROM	ALLOWED NEXT
Draft	Submitted
Submitted	Screening, InfoRequested, Rejected
Screening	DueDiligence, InfoRequested, Rejected
DueDiligence	Evaluation, InfoRequested, Rejected
Evaluation	Approved, Rejected
InfoRequested	Submitted, Screening
Approved	BoardApproved, Rejected
BoardApproved	Contracting, Rejected
Contracting	Disbursed
Disbursed	InRepayment
InRepayment	Closed

6 Seed data — 5 loan applications

Five applications are pre-loaded, one per credit-model scenario from

`PRDF_Credit_Model_With_Total_Client_Revenue.xlsx`, spread across the lifecycle so every stage has something to test. Find them in **Pipeline**.

#	BUSINESS	AMOUNT	TERM	STATUS	SCENARIO (GRADE · DAYS · RATE)
1	Thuli Manufacturing (Pty) Ltd	R250,000	3 mo	Submitted	PO Funding — worked example · Low · 90d · 15.5%
2	Sizwe Logistics CC	R500,000	6 mo	Screening	Contract Funding: Moderate · 180d · 17%
3	Kagiso Agri Supplies	R750,000	12 mo	DueDiligence	Contract Funding: High · 180d · 19%
4	Naledi Construction Group	R1,000,000	24 mo	Evaluation	Contract Funding: Worst · 180d · 21%
5	Bongani Trading Enterprise	R400,000	3 mo	Approved	PO Funding: Moderate · 90d · 17%

The application record stores amount and term (in months). The **risk grade and days-financed** are entered on the **Pricing tab** (WT-6) to compute the quote — that is where you reproduce the Excel numbers.

7 Walkthroughs

Each walkthrough is a numbered click-path. Log in as the role named in the walkthrough.

WT-1 — Log in and log out

- 1 Open `https://prdf-admin.vercel.app`. You land on the **Login** page.
- 2 Enter `superadmin@prdf.test` / `Prdf-Test-2026!` and click **Sign in**.
- 3 You land on the **Dashboard**.
- 4 To switch roles: profile menu (top-right) → **Log out**, then log in as another user.

The screenshot shows a login form titled "Welcome Back". Below the title is a subtitle: "Sign in to continue managing applications and loans." The form contains two input fields: "Email" with the value "superadmin@prdf.test" and "Password" with masked characters "*****". A blue "Sign In" button is positioned below the password field. At the bottom of the form, there is a link for "Forgot password?" and a note stating "Staff accounts are created by an administrator. Contact one to request access."

Figure 1 — Login page

Figure 2 — Dashboard after login

Expected: valid credentials reach the Dashboard; wrong password shows an inline error.

WT-2 — Dashboard tour admin

- 1 Review the summary tiles (pipeline counts, portfolio figures).
- 2 Use the left navigation to move between areas.

Figure 3 — Admin dashboard

Expected: tiles render with the seeded applications reflected in the pipeline counts.

WT-3 — Pipeline: find and open a case admin

- 1 Go to **Pipeline**.
- 2 Confirm the five seeded applications from §6 are listed with their statuses.
- 3 Click **Thuli Manufacturing** (R250,000, Submitted) to open the **Case** page.

Figure 4 — Pipeline list

Expected: all five appear; clicking opens the case workspace with a lifecycle rail at the top.

WT-4 — Case overview & advancing status intakeclerk

- 1 Open **Thuli Manufacturing** (Submitted).
- 2 On the **Overview** tab, review the applicant and requested amount.
- 3 In the left action rail, choose the next status **Screening** and confirm.
- 4 Watch the lifecycle rail advance.

Overview Documents Pricing Money Tasks Notes History Advisory (NFS)

Client name Test Client
Contact phone —
Business name Thuli Manufacturing (Pty) Ltd
Registration no. 2019/123456/07
Address 12 Industrial Rd, Johannesburg
Employment status —
Requested amount R 250 000,00
Term 3 months
Purpose Purchase Order Funding — supply of manufactured goods (Excel worked example: Low grade, 15.5%, 90 days).
Status Submitted
Created 02/09/2026, 13:22:05
Submitted 02/09/2026, 13:22:05

Figure 5 — Case overview + status action

Expected: status moves Submitted → Screening; an entry appears in **History**. An illegal jump (e.g. straight to Approved) is rejected.

WT-5 — Documents tab workflow / admin

- 1 On a case, open the **Documents** tab.
- 2 Review uploaded documents; open a document to preview it.
- 3 (If permitted) mark a document Verified / Rejected.

The screenshot shows the PRDF Admin interface. On the left is a dark blue sidebar with navigation links: Dashboard, Pipeline, Loans, Portfolio, Reports, and User Access. The main content area has a top header with the breadcrumb 'Dashboard > Pipeline > PURCHASE ORDER FUNDING – SUPPLY OF MANUFACTURED GOODS (EXCEL WORKED EXAMPLE: LOW GRADE, 15.5%, 90 DAYS)' and user controls for Profile, Alerts (0), and Logout. Below the header, the title 'PURCHASE ORDER FUNDING – SUPPLY OF MANUFACTURED GOODS (EXCEL WORKED EXAMPLE: LOW GRADE, 15.5%, 90 DAYS)' is displayed, along with client information 'Client - R 250 000,00 · #a1c1713f'. A progress bar at the top shows 11 steps: Draft, Submitted, Screening, Diligence, Evaluation, Approved, Board, Contracting, Disbursed, Repaying, and Closed. The 'Submitted' step is active. The 'Documents' tab is selected, showing a list of required documents: Bank Statements (3 months), Company Registration (CIPC), Financial Statements, ID Document, Proof of Address, and Purchase Order / Short Term Contracts. The 'Bank Statements (3 months)' document is highlighted, showing a message 'This document has not been uploaded yet.' and a file upload interface with a 'Choose file' button, 'No file chosen' text, and an 'Upload document' button. On the left side of the main content area, there are sections for 'Intake' (confirm intake and move to Screening), 'Case actions' (Assign to: Test Intake Clerk, Save assignment, Change status: select next status, Status note: Optional note, Update status), and 'Request info' (What is missing?, Request more info).

Figure 6 — Documents tab

Expected: documents list and preview render; verification controls behave per role.

WT-6 — Pricing tab (credit-model calculator) ★ riskanalyst

This is the credit model from the Excel.

- 1 Open **Kagiso Agri Supplies** (R750,000, DueDiligence).
- 2 Open the **Pricing** tab.
- 3 Enter: **Principal** , **Days financed** , **Risk grade** , **Days late** .
- 4 Click **Calculate quote**.
- 5 Verify the breakdown matches the Excel worked example **to the cent**:

LINE	EXPECTED
Annual rate	15.50%
Interest	R3,184.94
Initiation fee	R1,000.00
Management fee	R7,500.00

LINE	EXPECTED
Penalty (30 days late)	R5,063.70
Total due to funder	R253,184.94
Total client revenue	R16,748.64

- 6 Check the **late-payment scenarios** table: 30d R5,063.70 · 60d R10,127.40 · 90d R15,191.10 · 120d R20,254.80.
- 7 Re-run for the other scenarios in §6 (e.g. R750,000 / High / 365 days) and sanity-check the rate/fees.

Figure 7 — Pricing tab with the worked-example breakdown

Expected: numbers match the table exactly. (Rounding is round-up to the cent — see §12.)

WT-7 — Money tab (disbursement & repayments) financeofficer

- 1 Open an application that has reached a fundable stage.
- 2 Open the **Money** tab.
- 3 Review disbursement/repayment controls. (Only exercise these on test data.)

Figure 8 — Money tab

Expected: controls appear per role; recorded repayments update the schedule.

WT-8 — Tasks & Notes workflow

- 1 On a case, open **Tasks** — create a task, assign it, mark complete.
- 2 Open **Notes** — add an internal note; confirm it timestamps and persists.

Figure 11 — User Access, Assign Role dropdown (no Client option)

Expected: Client is absent from Assign Role; other roles assign/remove normally; the **Clients** KPI/filter still appear.

WT-11 — Role-based access differences

- 1 Log in as `riskanalyst@prdf.test` : confirm **no** Portfolio / Reports / Loans / User Access.
- 2 Log in as `admin@prdf.test` : confirm **all** areas appear.
- 3 Log in as `client@prdf.test` : confirm the admin portal shows **Access restricted**.

Figure 12 — Access restricted (client on admin)

Expected: navigation and gating match the matrix in §4.

WT-12 — Client portal (optional)

- 1 Log in at the client URL (§1) as `clientadmin@prdf.test` or `client@prdf.test`.
- 2 Confirm the client can see their applications and status.
- 3 (Dual user) confirm `clientadmin@prdf.test` can also enter the **admin** portal.

9 Reporting a bug

Include: which **test user/role**, the **URL/screen**, **steps to reproduce**, **expected vs actual**, a **screenshot**, and the time. Check §12 for anything that might explain it before filing.

10 Resetting / re-seeding test data

Test data is idempotent. If it drifts, an operator can re-run the seed scripts against the test DB:

- `infra/supabase/seed/seed-test-users.sql` — the 12 users above.
- `infra/supabase/seed/seed-test-applications.sql` — the 5 applications.

Both are safe to re-run (they converge to the same state). **Test environment only.**

11 Environment notes

- Admin portal: `https://prdf-admin.vercel.app` → API `https://prdf-api.vercel.app` → Supabase (`prdf`).
- Client portal: `https://prdf-lms.vercel.app`.
- If a page fails to load data, refresh and confirm you are logged in.
- Session expires after a period of inactivity — just log in again.

12 Known behaviours / notes

Rounding. Monetary results are **rounded up to the cent**. This can differ from the client's spreadsheet (standard rounding) by one cent on some totals (e.g. worked-example total R16,748.64 here vs R16,748.63 in the sheet). This is a known, deliberate configuration.

- **Risk grade** is a Pricing-tab input for now; it is not yet persisted on the application record.
- **Client role** cannot be assigned from the admin by design (WT-10).
- **Public estimate calculator uses the legacy model.** The client portal's landing-page "indicative estimate" (and the apply wizard's "Indicative Debt Breakdown") uses the old monthly-amortising model at **18.5% p.a.**, not the new credit model (Prime + risk-grade margin, 15.5–21%) staff see on the admin **Pricing tab**. Applicant-facing estimates will therefore differ from the staff quote — expected for now, pending alignment of the public calculator with the new pricing engine.

13 Screenshot capture checklist

Capture each at 1280×800 (or default window), logged in as the role noted, and save to docs/screenshots/ with the filename shown.
